TECHNICAL SKILLS

Core Languages: Java, Python, JavaScript, TypeScript, C/C++
AI & LLM Engineering: LangGraph, Agentic Workflows, RAG, Vector Databases, Prompt Engineering
Backend Technologies: Spring Boot, Node.js, Express.js, GraphQL, REST, Microservices
Cloud & DevOps: AWS (Certified Cloud Practitioner), Docker, Kubernetes, GCP Pub/Sub, HashiCorp Vault
Databases: MySQL, MongoDB, Redis, Google Spanner
Frontend: React.js, Redux, HTML5, CSS3, Material-UI

WORK EXPERIENCE

- Palo Alto Networks** October 2025 - Present
Senior Software Engineer Bangalore, India
- **Platform Intelligence Lead:** Spearheading the architecture of the internal AI Platform, serving as a foundational layer for cross-functional teams to integrate GenAI capabilities.
 - **Agentic Workflow Orchestration:** Designing scalable decision-making frameworks using **LangGraph** and LLMs to support complex, multi-step autonomous tasks.
 - Driving the adoption of AI-first development practices, conducting PoCs on emerging Large Language Models, and defining standards for prompt engineering and RAG implementations across the organization.
- Palo Alto Networks** August 2023 - October 2025
Software Engineer Bangalore, India
- **AI Assistant Development:** Developed and deployed an AI-powered assistant using **LLMs** and **Agentic flow** to automate queries across licensing databases, reducing manual effort by **40%** and cutting L2 support load by **50%**.
 - **Licensing Modernization:** Led full-stack architecture modernization of licensing systems, transforming legacy infrastructure into scalable, high-availability platforms prepared for peak demand.
 - **Security Integration:** Integrated **HashiCorp Vault** with Java applications deployed on **Kubernetes**, strengthening security posture and optimizing secret management practices.
 - **Database Optimization:** Developed scripts and cron jobs to eliminate data inconsistencies in critical product databases, reducing P0/P1 incidents by **80%**.
 - **Operational Efficiency:** Designed a full-stack application (ReactJS, Spring Boot, MySQL) enabling the L2 team to execute and monitor database queries safely, significantly improving operational visibility.
 - Enhanced Business Events API response time by **75%**, ensuring faster data processing and improved user experience.
 - Achieved **Top 5** ranking in internal hackathon by developing a PoC for generating test cases using LLMs.
- Palo Alto Networks** Jan 2023 - July 2023
Software Engineer Intern Bangalore, India
- Contributed to New Product Introduction (NPI) programs, leveraging Java Spring Boot and MySQL for seamless product onboarding.
 - Developed complex database migration scripts in JavaScript/MySQL, reducing manual effort for L2 teams by **90%**.

PROJECTS

- TestForge (VS Code Extension)** | *React, TypeScript, Python, LLMs*
- Designed and developed a VS Code extension to generate unit test cases using Large Language Models (LLMs).
 - Implemented customization options for specific business logic, enhancing developer productivity and testing coverage.
- Annotate-Js** | *TypeScript, Node.js, AWS-RDS, Redis*
- Developed a lightweight JavaScript library that allows users to annotate live web pages seamlessly.
 - Open-source contribution offering easy integration via a script tag for any web application.
- Portfolyo** | *MERN Stack, Docker, GitHub Actions*
- Architected a no-code portfolio builder allowing non-technical users to deploy personalized websites.
 - Scaled platform to support **5,000+ visits** and **100+ registered users**.

ACHIEVEMENTS

- **Codeforces Specialist:** Highest rating of **1450** | **CodeChef 5-Star:** Highest rating of **2018**.
- **Hackathons:** Winner of Smart India Hackathon 2022; 2nd Place in DevJam 2.0.
- **Global Rankings:** Ranked 821 (Country-wise) in Google HashCode 2022.
- **Certifications:** AWS Certified Cloud Practitioner.

EDUCATION

CMR College of Engineering and Technology Hyderabad, India
B.Tech in Computer Science and Engineering (CGPA: 9.1) 2019 – 2023
